

anterraDataCenter™

SQL Data Warehouse for Sage Timberline Office

Anterra Technology is an Authorized Sage Timberline Office Development Partner that specializes in the commercial real estate and construction industries. Our data warehouse product anterraDataCenter™ merges an unlimited number of Sage Timberline Office data folders into a single Microsoft SQL™ data warehouse.

All Sage Timberline Office data is available to show on the same report: GL, Job Cost, AP, Payroll, Service Management, Purchasing and Inventory, Project and Property Management. Data is updated continuously, on a schedule or on demand.

Using anterraDataCenter™ has many benefits:

- Complex report speed increases dramatically – reports run in seconds off large data files
- Run reports that combine information and results from multiple Timberline data folders – include information from multiple companies or current and archived data
- Use Crystal or SSRS Reports to publish information to the Sage Timberline Office Desktop, to Microsoft SharePoint™ or to your company's intranet
- Sage Timberline Office Desktop speed increases dramatically – refresh dashboards in seconds

Drive your business without a speed limit
